

QUALITY POLICY

Territory Instruments prime focus is to provide instrument and electrical services in accordance with our client's requirements in the most cost effective manner.

Territory Instruments is committed to the following actions:

- Maintain a quality system that complies with ISO / NZS 9001 Quality Management System, and other applicable standards, legislation.
- Ensure that all personnel are familiar with the quality system and implement the policies and procedures at all times.
- Maintain all test equipment and ensure NATA standard calibration checks are completed on a regular basis.
- Management will provide all resources necessary to ensure our clients needs and expectations are met.
- Compliance with applicable requirements and regulations.

Be aware that maintaining a quality system is of prime importance
This policy is communicated through the organisation.

All employees, subcontractors and visitors are required to abide by this policy.
